AQUASTAIRS

Durable and built to last, using UV-stabilised food grade polyethylene. BPA free.

Can be used for inground or above ground pools, with minimum maintenance required.

For added protection from the sun, a mounting hole allows you to insert your own outdoor umbrella.

Marine-grade 316 stainless steel handrails for each side are available, for safer entry and exit.

2 Year Warranty

Excludes handrails.

Pool maintenance can be time-consuming, but this easy to install pool staircase requires minimum maintenance, and can even be left in place during the winter months. They are sturdy, and can withstand up to 255 kgs at any one time.

Constructed from one piece UV-stabilised food grade polyethylene, it is not only durable, but 100% recyclable, making it an environmentally friendly choice.

With safety a top priority, the top step has an extra large curve to provide safer entry and exit, and a comfortable seating area. It includes two 316 stainless steel handrails on each side for extra assistance.

It also includes a cylindrical mounting hole to insert your outdoor umbrella, providing further protection from the sun.

Will suit above ground pools with a height of 1200 mm to 1320 mm, or 1370 mm deep.

Available in Natural or Blue to suit your pool.

Natural

Blue

Custom colours can easily be arranged at no additional cost, give us a call to discuss.
