

6000 Litre Modular Slimline Water Tank

Shown in Heritage Red

Built to the highest of Australian standards, this modular slimline water tank has been designed to be durable, in order to withstand the harsh Australian weather.

Our modular slimline tanks are suited for properties that need the water storage, but require some flexibility. You can always add on more tanks at a later date, and then simply interconnect them. Only available backyard space can constrain the number of tanks that are connected.

Configuration is not limited to tanks of the same water capacity, you can mix tank sizes that share the same height.

- Built to last, using UV stabilised food grade polyethylene. BPA free.
- One-piece cylindrical construction that ensures 'hoop' strength and stability.
- Complies with AS/NZS 4766 standard for above ground tanks.

Specifications

Width: 1320 mm or 680 mm Length: 2870 mm or 6140 mm
(Dimensions are measured end on end / side by side)

Height: 2160 mm
