

RPS57E MULTISTAGE SUBMERSIBLE PRESSURE PUMP

EU SERIES

Exclusive to the market, this REEFE® submersible pressure pump features an integrated pressure controller for easier installation and seamless operation in Rainwater supply applications. 100% European made, guarantees exceptional quality and performance. This pump is compact, lightweight and robust for extended service life across various applications.

APPLICATIONS

- Rainwater Systems
- Irrigation
- Clean water transfer from tanks
- Rain to Mains systems

FEATURES & BENEFITS

- Automatic start and stop depending on demand of water by users.
- Integrated pressure controller with 220kPa/ 2.2 bar cut-in
- Supplied with 20m H07RN8F Power Cable
- Float switch for run-dry protection
- Valve blockage detection system
- Integrated check valve
- Compact design
- Water-cooled motor
- Thermal overload protection
- Corrosion resistant 304 Stainless Steel
- Maximum water temperature 35°C
- Tested to AS4020 for potable water
- Tested to 1 million cycles

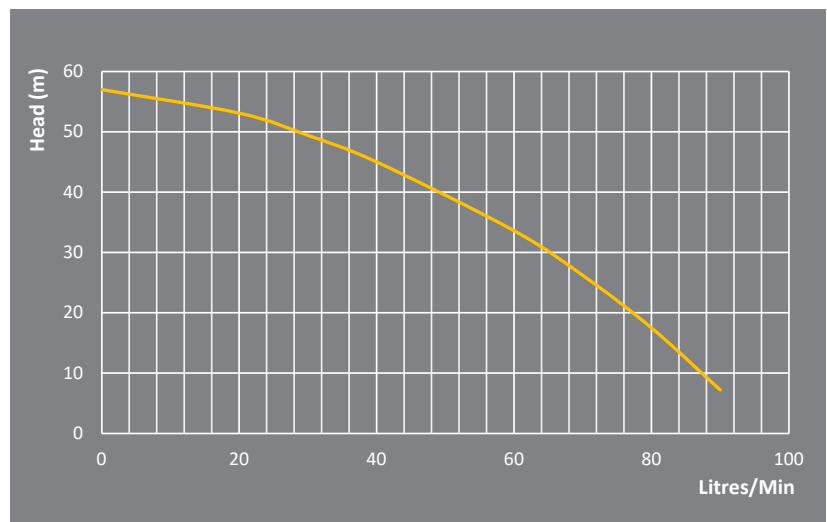

CONSTRUCTION

- Stainless Steel AISI 304 Pump body, motor shaft, handle, cover, screen
- PPO Impellers, diffusers
- Alumina.Graphite, lubricated mechanical seal
- PPO Polymer Float switch
